Border Edge

Border Edge

Description

The Border Edge is a unique product for creating boundaries in various areas of the garden. It is a stylish and durable product for easy creation of boundaries between different areas of the garden. Flower-beds, lawn, mulched areas and other areas of the garden can be separated with Border Edge making the garden look groomed.

The steel Border Edge painted matte black and embedded into the ground makes the garden look neat and easy to maintain.

User instructions

The Border Edge can be used to create beautiful shapes in the garden because it can be bended easily into the desired form. Installation is very easy thanks to its flexible structure. The Border Edge is installed by lightly tapping with a rubber hammer. The product does not need truncating because the parts can be overlapped to the desired length or joined together with connectors. The Border Edge is safe to use due to its rounded upper rim.
